Indigenous Believes - Responsibility to Protect

The Responsible

The below stated question is addressed to all of the United Nations member states that have not ratified any of the United Nations indigenous protections such as the UN ILO C169 - Convention on the Indigenous and Tribal Peoples (1989), UN A/RES/61/295 - Declaration on the Rights of Indigenous Peoples (2007), and same question to all of the United Nation member states that had ratified indigenous protections, but never created a due process to determine indigenous claims and by neglected the indigenous individuals or groups.

Question of Responsibility.

How will the United States of America and all other industrial states that are members of the United Nations secure collapsing ecosystems and environments symbiosed to the indigenous groups - in the event of those member states elite industrial community departure to other states leaving behind toxic environment and exploited natural resources of many of the world's indigenous groups such as my - the Arcticus Blancus indigenous polar hair climate tribe.

Farmed salmon in the Kingdom of Norway is dying due to captive farming and wrong nutrition. The wild salmon in the Eastern United States of America died completely due to industrial elite that dispersed as always when they noticed what they have done. Indigenous fishery in the Baltic does not exist like the borders in the European Union.

There are people in this world that cannot leave their indigenous ecosystem like foreign companies that destroy the lands, waters, and air. Has democracy been created for foreign companies or for indigenous persons and groups?
